

Geoscience Laboratories Access Policy

All users of the Geoscience laboratory “Supporto raggi-X” must receive the General Safety training.

You can do this following this link:

<https://elearning.unipd.it/servizioformazione/>

select “Area Sicurezza” and “FORMAZIONE GENERALE.

Select “General Training (4H)” (en) or “Formazione Generale (4H)” (it)

click on SSO and enter your UNIPD e-mail user name and pwd,

fill in the blank field typing “sicurezza”, and click on “Iscrivimi”.

If you do not have a UNIPD e-mail, please click on the tab “Login without Single Sign On” at the bottom right, and use the instructions and password you have been supplied with.

You will need to view the course materials and then take and pass a quiz. At the end, click on “Get your certificate”, print a copy and bring it to the laboratory manager (Maria Chiara Dalconi, room 02-052) or send it by e-mail (mariachiara.dalconi@unipd.it).

Additional safety training may be required before using specific equipment.

Access will be through the laboratory manager; she will verify that safety training requirements are met prior to approving access.
