

DIPARTIMENTO
DI GEOSCIENZE

Via Gradenigo 6, 35131, Padova

Martedì 27 Marzo
ore 15-16:30
Aula 1F

PLANMAP
Geologic Mapping of our Solar System

Planetary Geological Mapping in the 21st Century

a Horizon 2020 project

The two faces of planetary mapping: geology vs geomorphology

Prof. David Rothery - The Open University

The quest for planetary composition

Dr. Cristian Carli - IAPS, INAF

Challenges of planetary chronology

Prof. Harald Hiesinger, WWU Munster

The art and science of robotic exploration

Prof. Nicolas Mangold - LPG Nantes

Big planetary data and geology

Dr. Angelo Pio Rossi - Jacobs University Bremen

The three-dimensional geology for the future of planetary exploration

Prof. Matteo Massironi - Dipartimento di Geoscienze,
Università degli Studi di Padova

Astronauts field training and future human exploration

Dr. Loredana Bessone, Dr. Francesco Sauro - European Astronaut Centre, ESA

This project has received funding from the
European Union's Horizon 2020 research
and innovation programme under grant agreement No 776276
